

Q: which methods cover the whole threat model, and what do they charge?
A: redundancy covers it and pays on every session; the hybrid covers it and pays only where it matters

— prevents nothing (no defence at all) Luo & Li 2025 trust derating Always redundant (ours)

···· prevents all relay damage Threshold (ours) Graded (ours)

▨ Bi+ 2023 key-aware routing Kiktenko+ 2024 XOR multipath Hybrid (ours)
